

Hygiene Innovation

for the food industry

2

Who We Are

HCI is a market leader in the improvement, design and manufacturer of Hygiene and PPE products and systems to the food processing industry.

Each product featured over the next few pages has been through the steps of design, specification, testing and packaging with every new product being rigorously tested through our 'Manufacturing Sampling Process' involving several stages of customer feedback before market launch.

If you are looking to drive efficiencies and reduce waste on your PPE & Hygiene products and systems then please reach out to one of our consultants to explore the possibilities.

Research and Development

Research and Development is at the very heart of what we do.

Are you experiencing areas of non-conformance and don't have the right tools to bring a satisfactory result? Find out today what our R&D department can develop to solve your challenges.

Some examples in our arsenal include:

- Dispensing Systems
- Automated Online Stock Management Package
- Bespoke Clothing
- Half Moon Overhead Scrapers
- Telescopic Food-safe Inspection Mirrors

Utilise our 'IB triple D' Process today to improve your factory:

*Identify
the

Vinco® - CentreTug®

CentreTug® Wiper in a water resistant tub has been manufactured to help you reduce waste and prevent cross contamination. This wiper has excellent strength and is manufactured from specialist material, not paper. We have worked with a number of food processing plants to bring this product to market and many of our clients are finding it to be a great replacement to j-cloth, lavette cloth, GP Cloth, paper roll and many other general cleaning cloths.

CentreTug® Wiper in a Tub

- Robust, wipe clean and high capacity tub.
- Refillable – Better for the environment, less wastage. Easy pull off lid.
- Portable – Move to any location.
- Carry Handle – Easy to carry.
- Resealable – Keeps wiper dry and prevents cross contamination.
- Water Resistant – can be left in washdown areas.

CentreTug® Wiper Refill Pack to fit Tub

- Can be used in any food area.
- Smooth and Extremely Absorbent – will pick up liquids quickly.
- Two surfaces - scrubbing side and polishing side.
- 400 sheets per roll – Large roll to reduce frequency of reload.
- Coreless roll – no core to remove before use.
- Perforated roll – reduces wastage.
- Two Rolls Per Pack.

Do you require a sample?

Vinco® - SuperWipe

SuperWipe is manufactured from 68gsm. Apertured Spunlace Non-Woven Fabric, treated with Antibac compound to limit growth of bacteria within the cloths and are carefully manufactured for the food processing industry.

- SuperWipe is Apertured and Solid-Colour-Coded
- Non-Woven Towel
- Absorbent & Hygienic - Can be rinsed/washed and re-used.
- Choice of 5 colours

SuperWipe Wiper In Tub

SuperWipe Wiper Refill Pack to fit Tub

Vinco® - GoldWipe

Disinfectant Wet Wipes

Manufactured for the food industry

- Alcohol, QUAT and PHMB free solution designed to clean and disinfect food contact surfaces
- Specifically designed to rapidly clean and disinfect all hard surfaces
- 1500 wipes per tub, especially suited to food hygiene environments
- Blue wipe colour ensures easy detection
- Impregnated with an alcohol free solution that is ideal for sensitive food preparation environments including Halal and Kosher
- Effective against a wide range of microorganisms including bacteria, fungi, yeasts and viruses
- Independently taint tested in accordance with BS ISO 4120:2004
- Sanitises utensils and surfaces within food environments
- Sheet size: 200 x 200mm

Improve segregation, allergen and speciation control in your factory with our **StationAll®** Range.

StationAll® colour coded bespoke shadow boards, bond laminates and PPE Stations are essential for 5S and lean management delivering:

- "A place for everything and everything in its place".
- Work place standardisation with greater efficiencies.
- Maximise utensil life by reducing replacement costs
- Ensure appropriate equipment is always available
- Reinforce colour coding policies in every area
- Raise departmental accountability and operating standards
- Provide instant management and auditing overview

StationAll® - Alu

Our **StationAll® - Alu** pure aluminium composite shadow board materials are guaranteed not to contain compromising heavy metals found in some alternatives and are 100% water repellent. Clear definition print outlines provide that superior image that every department deserves impressing customers and auditors.

NEW!

StationAll® - Bond

The all New **StationAll® - Bond** has just joined the range to make your life even easier. Save time and money with the **StationAll® - Bond** and make your factory audit ready in seconds. **StationAll® - Bond** material is made from laminate coated water repellent material and comes with a sticky backing.

Simply clean down the surface you would like to apply the **StationAll® - Bond** to. Unroll the laminate, bond the top part of the laminate to the wall, get it level and peel the back of the laminate off ensuring that no air bubbles get trapped behind the laminate as you go. Now you just need to attach the hanger rail to the wall and line up the hooks and hangers with the shadows.

StationAll® - PPE

Our **StationAll® - PPE stations** are made from pure aluminium composite materials and are 100% water repellent. Clear definition print outlines provide that superior image that every department deserves keeping all your teams PPE and Workwear tidy and in order when not in use. Available in a range of colours, metal or plastic hooks, shelves and shadows. Stainless Steel storage systems also available.

Colour options for all boards, bond laminates and stations:
 White shadows on coloured background | Coloured shadows on white background | Coloured outline, on white background | Or any colours of your choice | Equipment codes | Your company logo, introduce your company logo to enhance corporate ownership and pride in workplace. | Headings, identify work station or department to which utensils belong | Instruction messages.

Highlight specific details in support of management directives. This may include visual instructions (e.g. photos) detailing key inspection points or quality standards.

Our in house design team can design pretty much any shadow shape you require. Let us know what you want and we will see what we can do!

Every Bespoke **StationAll®** Board is made to order. We also do standard **StationAll®** Boards in 4 standard colours please ask our team for more detail.

COLOUR CODED EQUIPMENT

7

We offer a comprehensive range of the most advanced hygienic cleaning tools available, featuring the pioneering Resin Set DRS® brushes, Anti-Microbial tools, and metal detectable plastic MDX brushes and cleaning equipment. Our ranges are available in up to 12 colours and made from FDA and EU approved virgin materials. Our brushware contains stainless steel staples and does not use flagged fibres.

- Standard Brushware
- Resin-set Brushware
- Anti-microbial Brushes
- Tube, Wire & Pipe Brushes
- Floor & Hand Scrapers
- Floor & Hand Brushes
- Shovels, Paddles & Rakes
- Squeegees
- Dustpans, Scoops & Jugs
- Containers & Buckets
- Waterflow Equipment
- Handles & Telescopic Poles
- Window Cleaning Equipment
- Deck and Yard Brooms
- Wall & Floor Mopping Systems
- Metal Detectable
- Dust Control
- Hanging Rails and Hooks
- Thermometers

IFHM - Industrial Food Hygiene Management

We partner with Selden Research (a chemical manufacturer est. over 50 years) to provide an innovative, effective and rapid food hygiene management system that uses a tailored approach to disinfection regime and products employed. Using their comprehensive laboratory facilities for continuous investment in development and quality, the Jeyes Professional range of chemical solutions is fully compliant with the latest regulations.

HOW WE WORK WITH YOU:

STEP 1 : SURVEY & AUDIT

An understanding of your requirements is key to the successful rollout of an IFHM solution tailored to the specific cleaning needs of your food manufacturing facility. An initial site survey carries no obligation and throughout we work alongside you to ascertain your immediate requirements. Following this first visit, you will receive a recommendations report and a 'road map' for the full deployment of IFHM.

STEP 2 : IFHM CONTENT

A prototype online IFHM kit is created within 48 hours of the initial site visit. While a 'draft' version, it will outline all the cleaning processes, tasks, hazards, suggested chemicals, cleaning schedules etc appropriate to your site. A second site survey date is agreed for reviewing and tuning the initial version of IFHM with you to create a 'final' system incorporating the data and documents you need and, of course, you may continue to further refine the system with or without our intervention.

STEP 3 : INFORMING YOUR HYGIENE STRATEGY

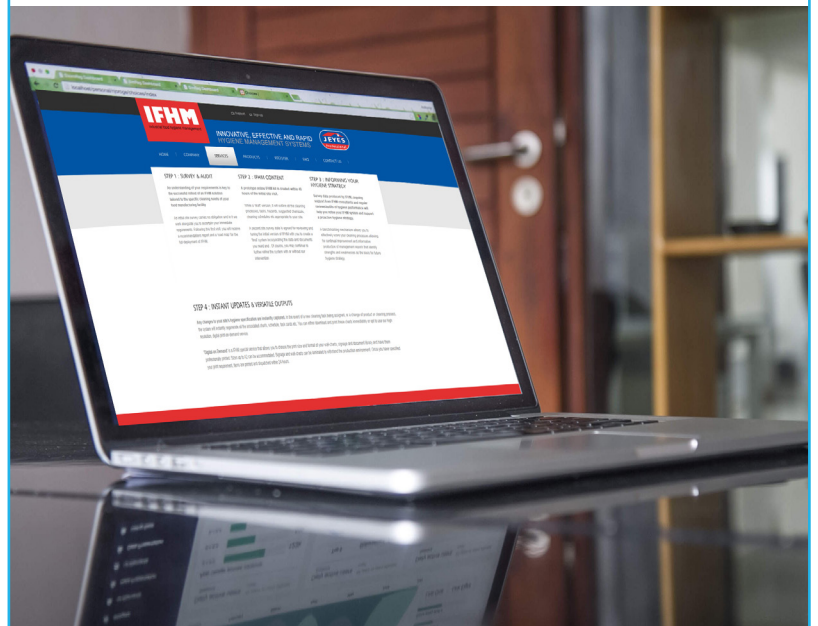

Survey data produced by IFHM, ongoing support from IFHM consultants and regular reviews/audits of hygiene performance will help you refine your IFHM system and support a proactive hygiene strategy. A benchmarking mechanism allows you to effectively score your cleaning processes allowing for continual improvement and informative production of management reports that identify strengths and weaknesses as the basis for future hygiene strategy.

STEP 4 : INSTANT UPDATES & VERSATILE OUTPUTS

Any changes to your site's hygiene specification are instantly captured. In the event of a new cleaning task being assigned, or a change of product or cleaning process, the system will instantly regenerate all the associated charts, schedule, task cards etc. You can either download and print these charts immediately or opt to use our high resolution, digital print-on-demand service.

'Digital-on-Demand' is a IFHM special service that allows you to choose the print size and format of your wall-charts, signage and document library and have them professionally printed. Sizes up to A2 can be accommodated. Signage and wall-charts can be laminated to withstand the production environment. Once you have specified your print requirement, items are printed and dispatched within 24 hours.

Your Online 'Digital-on-Demand' Tool

- BRC7 / BRC8
- SALSA
- REACH
- MRL Legislation
- Biocidal Products

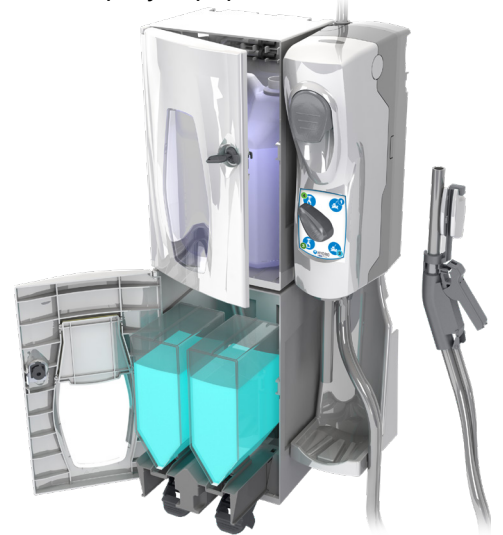

IFHM Package Provides:

- Compliance with Legislation
- Cleaning Instruction / Task Cards
- Colour Coding
- Dilution Rates
- Key Inspection Points and General Area Photos
- H & S and Management Detail
- Dedicated Web Portal
- One Log In to control Multiple Sites
- All Cleaning Related Paperwork in One Place
- Instant Access to Data Sheets
- Online Training Record
- Bespoke Package for Every Site
- Simple to Maintain
- COSHH Training Manual
- Methodology Training
- Certificate of Attendance

IFHM Product Range:

- Foam Cleaning 4 Products
- Highly Concentrated Typical Dilutions 1-3%
- Alkaline, Caustic, Chlorinated and Acidic
- Hard Surface Cleaning / Washing 3 Products
- Highly Concentrated Typical Dilutions 0.5-10%
- Disinfectants 3 Products (plus R&D on a long term replacement for QAC based products)
- Quat, Alcohol or Peracetic Acid Based
- Pass EN1276 @ 1%
- Fast 5 Minute Contact Time
- Foaming Machines and Spray Equipment available

CHEMICAL STORAGE

The medium-duty hazardous substance cabinet that complies with all relevant COSHH regulations. These are purpose-built for the indoor safe storage of flammables and chemicals, including paint and other hazardous substances. Fully compliant with all legislation relating to the control of substances hazardous to health (COSHH), this robust range of cabinets features a liquid-tight sump to contain spillages, as well as galvanized shelves for maximum durability.

Guard[®]

PREVENTING CONTAMINATION - Headwear - Body Protection - Hand Protection For The Food Industry

Why Guard[®]?

Guard[®] has been born to exceed your expectations and to prevent cross contamination in your food factory. We are designing, developing and manufacturing a range of Headwear, Body Protection and Hand Protection made from specialist material.

- Do you have instances of hair and foreign body contamination?
- Is your current headwear uncomfortable?
- Ill-fitting garments causing non-conformance?
- Want to reduce products to landfill and increase your 'green' credentials?

'If you can imagine it and it can be made from Guard[®] material, we can manufacture it...speak with one of our consultants.'

NEW!

Guard® Heat Resistant Gloves are ideal for hot food production factories and bakery's.

- Heat Resistant: Tested to Level 5 (up to 500°C) for contact heat according to EN407&EN420
- Heat and Flame Resistant
- Made from Meta & Para-aramid
- Grip: Non-slip Silicon Grip pattern offers good grip for safer handling
- 5 Finger Flexibility. Ambidextrous: Can be worn on either hand, extending the life of the glove
- Extra Long Cuff Arm Protection
- 430mm Overall Length

Guard® Heat Resistant Gloves

Installation Service

We have five experienced installation teams, covering the UK, available for equipment fitting.

Old equipment can be removed (and disposed of if required) and new equipment installed at the client's convenience.

New equipment can be installed using existing screw holes and covering previous fitting marks. Walls will be made 'good' and aesthetically pleasing.

New equipment will be installed in the correct position to ensure maximum efficiency and economical usage.
